Update to Submerged Vehicle Investigation

The Fire Department Dive Team is responding to Harshaw Lake to continue their search. Just a correction on the vehicle removed from the lake last night. It is a 2010 black Jaguar XKR convertible with a New York tag. The original release identified the car as Porsche.

The registered owner of the car, a 46 year old man, does have family who reside locally. They have indicated that he was visiting them and had left their home to pick up some food and planned to return to their residence yesterday evening. When he did not return and did not respond to their calls, they drove out to look for him when they discover the recovery activity at the lake.

We will not be releasing the registered owner’s identity pending further investigation.
