Fire Rescue Notice

For Immediate Release:
September 10, 2017

A notice from Fire Rescue

St. Petersburg Fire Rescue is ready to deal with calls for rescue, medical response, fire incidents, and hazardous materials throughout the storm. The priority will be on saving lives.

We expect a significant number power lines to come down due to the high winds. However calls for wires down will be a low priority. We ask the public to be extremely careful and not approach downed power lines until they can be de-energized and removed.
